We enhance nordic cooperation to handle climate change

What kind of a summer will we face this year? Will the heat and drought we experienced last summer repeat? Read about how NKJ works with the issue in the article beneath! In Australia water is very valuable because of the drought. Read about how to grow crops when water is scarce.

Climate change adaption: the Nordic countries can do it together

NKJ arranged a workshop, gathering stakeholders from a broad range of sectors with the purpose to make the Nordic countries work smoothly together and prepare for the effects of climate change. Cooperation will be beneficial for all Nordic countries - we saw the need for it last summer.

Farmers fluent gold

Water is a valuable resource - especially when it doesn't occur naturally. In Australia the rights to water is regulated and traded. Our secretary Per Hansson gives you an insight in the value of water after a trip to the other side of the globe.
