Apply for funding for networking in agriculture and climate

NKJ wants Nordic researchers and stakeholders to get together to exchange knowledge, cooperate over the nation borders and perhaps write large scale applications together. Apply now for funding for two years of networking activities in agriculture and climate! The focus areas of the call are soil as a carbon sink, alternative proteins, arctic agriculture and climate and extreme weather. However, we also encourage networks with focus on other aspects of Nordic agriculture and food research to apply for funding.
