Soil as a carbon sink – more seminars to come!

Our seminar on soil as a carbon sink on November 26th was a success. The seminar provided an overview of the state of Nordic knowledge on soil as a carbon sink. The conditions for Nordic cooperation within the area is good due to the countries' similar soil types, climate and policies. We will arrange three more seminars during

spring 2021 – follow us on [Facebook](#), [LinkedIn](#) and [Twitter](#) and you won't miss out on anything!

We work on finding solutions to extreme situations

The working group on agriculture and drought agreed at the last meeting that the most important issue for increased crisis preparedness for Nordic agriculture, is to create open channels between researchers and other stakeholders in the various countries. We start the mapping know!

NKJ gathers interdisciplinary expertise to facilitate collaboration and communication between the Nordic countries. We aim to identify challenges linked to climate change and extreme situations affecting the Nordic agricultural sector. We provide a collaborative hub that facilitates the dissemination of sustainable solutions for the future.

Don't give up on networking!

All our networks have been extended with new reporting deadlines due to the Corona pandemic. We strongly recommend our networks to use NKJ funding for arranging digital meetings instead of using the funding for travel costs. We have tried, and digital meeting can be really efficient!
