### Soil as a carbon sink is a topic with many stakeholders

Soil as a carbon sink is of interest to a wide range of stakeholders, and focus point for multiple initiatives. In addition, knowledge is developing fast. This creates a complex ecosystem of actors, organisations and knowledge which makes it challenging to comprehend what is ongoing and by whom.

In this film, the last out of four, you will meet a range of organisations and companies, and get to know how they are working to increase carbon storage in soil.

Please have a look at the [NKJ and SNS suggestions for the next step!](#)

### Crop wild relatives are important for future food production

The concept of crop wild relatives needs to be better known. The important plants also need to be included in management plans for protected areas.

Important conclusions like these were drawn recently during a stakeholder workshop in Oslo. NKJ was one of the

financiers.
