### **African swine fever changes Nordic wild boar management**

The first case of African swine fever has been discovered in the Nordic region, in Fagersta, Sweden. This changes the perspective on the wild boar in the Nordic countries. Professor Petter Kjellander is the author of a report published by NKJ in 2022, with focus on the different ways of dealing with wild boar in the different Nordic countries, and how to cooperate on it. Hear him talk about the new situation in the Nordic region.

### **Nordic cooperation helps saving farm animal genes for the future**

Jaana Peippo is a steering group member of the researcher network [NordFrost](#), and tells in this interview (click the picture to the right) about the work with creating a gene bank for Nordic farm animals, and the impact of Nordic cooperation on that work.
