Bioeconomy Hackathon 2024

May 27–28 2025, Saarijärvi, Finland

Want to explore innovative solutions for reducing Co₂ emissions and advancing sustainable energy practices?

Are you a student in the Nordic or Baltic region, studying computer science, engineering, agriculture, forestry, marine sciences, bioenergy, environmental studies, or a related field?

Participate in an all expenses-paid weekend of finding solutions to bioeconomy challenges!

The hackathon will include networking events, social activities, event dinners, mentoring and other group activities to enable you to get to know your peers and the experts.
