

We wish you a nice summer!

Warm summer greetings! NKJ hopes you're enjoying a well-deserved break. The autumn promises to be busy and inspiring, with new projects and collaborations on the horizon for agriculture, reindeer herding, and all parts of the bioeconomy. Stay tuned – we'll be back with updates. Until then, have a fantastic summer!

Empowering the Next Generation of Data Scientists in Nordic Agriculture

The Nordic, NKJ co-funded, network NADAS is launching specialist courses in Julia and R to equip early-career researchers with the data science skills needed to tackle modern agricultural challenges. By focusing on open-source tools and practical applications, these courses aim to bridge the gap between data science and agricultural research, helping secure a sustainable and innovative future for Nordic food systems.

Nordic contacts important in narrow sectors

Olle Anderbrant is the coordinator of the research network “Developing Integrated Pest Management in Nordic currant production” – a network connecting academia and practice, and working with concrete problems in currant and gooseberry production. He is pleased with the Nordic contacts and the benefits they have brought. Hear what he sees as the main benefits [here!](#)

More on the networks mapping of threats

Nordic Collaboration in Action: Students Explore Nordic Cooperation

Last week, a group of bright students from the SNS and NKJ student network visited Copenhagen! Their visit was packed with insights into Nordic cooperation, shared Nordic challenges, and the global impact of the joint Nordic efforts.

From deep dives into the work of the Nordic Council of Ministers, a network meeting, and a visit at the University of Copenhagen's Landbohøjskolen, the students explored both policy and nature, including a stunning walk through a campus park and a rose garden in full bloom!

Nordic Initiative Boosts Reindeer Husbandry for Food Security

The Nordic Reindeer Committee has launched an initiative to increase knowledge about the role of reindeer husbandry in the Nordic-Arctic food system and its importance for food security.

A central goal is also to identify potential lessons between the countries and provide recommendations for how the role of reindeer husbandry in Nordic food security can be developed and strengthened.

There will be more news from this project during the autumn, so keep tuned!

More about the project

Roadshow event 3: BioBoosters Demo Days 2026

Join the Nordic Testbed Network at Tarvaala Bioeconomy Campus in Lake Finland for the third roadshow event – a dynamic blend of education, research, and innovation. Experience live demos from BioBoosters companies, network with participants, take part of farmers experiences, visit an HRV farm, and explore real-world test environments.
